*Product Care's  
 Saskatchewan Paint Program*

December 2005

Important Notice to Product Care Paint Members

**Product Care SK Paint Program starts April 1, 2006**

Saskatchewan Environment has just issued an “Approval to Operate a Product Management Program” (file 24030-50/PAINT) to Product Care for its Saskatchewan Paint Program. The following is an update based on the “frequently asked questions” (FAQs) we sent you in October:

1. April 1, 2006 program start date: The program will begin on April 1, 2006. On that date, consumers will be able to drop off unwanted household paint at 70 Sarcan bottle depots across the province.
2. Joining the PCA SK paint program: If you are doing business in SK, you are invited to join PCA’s SK paint program using the form that accompanies this notice.
3. Eco fees: Effective April 1, 2006, eco fees are payable to Product Care for any paint sold in Saskatchewan. Depending on your distribution and accounting systems, you may need to apply the fee to product shipped before April 1. The SK eco fees will be the same as the fees for the B.C. paint program.

Container Size	Typical Size	Eco Fee/Unit
100 ml ** to 250 mls		\$0.10
251 ml to 1 Litre	1 US Quart / 945 ml	\$0.25
1.01 Litre to 5 Litre	1 US Gallon / 3.78 L	\$0.40
5.01 Litres to 23 Litres	5 US Gallon / 18.9 L	\$1.00
<b>Aerosol</b> paint containers (all sizes)		\$0.10

4. Reporting and remitting: a “SK Paint Eco Fee Report” will be supplied to you by Product Care before the program starts (and be available on our website: [www.productcare.org](http://www.productcare.org)).
5. Products included in the program: Product Care’s SK program is **only for paint** (liquid and aerosol). The product list is the same as for Product Care’s BC paint program.

**\*\* Note the new minimum size of 100 ml.** No fees are payable on paint containers smaller than 100 ml (such as sample pots and pouches).
