Lighting Fixtures and Products	\$0.15			
Ballasts/Transformers	\$0.15			

Latest Version Statement

This document is up to date as of April 2016 and supersedes all preceding Accepted Product Guides, policies, EHF tables and definitions.

Please recycle any previous hardcopies and delete all previous electronic copies.

Purpose of this Guide

This guide provides an easy one-stop resource for members to access information about light and lighting equipment stewardship programs managed by Product Care Association (PCA) across Canada, including the governing regulation, included/excluded products, Environmental Handling Fees (EHFs), and provincial rules governing the visibility of fees.

This guide is not meant to replace legal advice or provide interpretation of any applicable regulation. For all legal matters, consult a legal professional.

Definition of Environmental Handling Fee (EHF)

The LightRecycle / RecycFluo program is funded by an EHF applied to the sale or supply of all applicable products according to relevant laws. EHFs vary by product type and by jurisdiction. The EHFs are used to cover program costs, including managing the collection, transportation and recycling systems for applicable products.

The EHF is not a government tax nor is it remitted to the government. The EHF is subject to sales tax as it is considered to be a part of the price of regulated products.

EHFs are payable by LightRecycle / RecycFluo members to PCA, and it is the decision of the member how to manage this business cost. With regards to the visibility of EHFs on product invoices and receipts, manufacturers, retailers and wholesalers must apply EHFs according to the rules specific to their jurisdiction. Fee visibility requirements are outlined in the relevant sections below per province.

**BRITISH
COLUMBIA**

BRITISH COLUMBIA

The British Columbia (BC) LightRecycle Program began on July 1, 2010 and included residential-use fluorescent lights only. On October 1, 2012, the program expanded to include all lighting products, including all types of light bulbs and tubes, lighting fixtures and ballasts used in residential, commercial, institutional, and industrial applications.

BC Regulation

The BC LightRecycle program was created by PCA on behalf of “producers” whose products fall under the  Electronic and Electrical Product Category” of Recycling Regulation ([B.C. Reg. 449/2004](#)) of the Environmental Management Act ([SBC 2003] CHAPTER 53). All producers of these products are obligated to be part of a product stewardship program.

Under Schedule 3, Section 2 (1) (e) of the BC Recycling Regulation, “all electronic or electrical lighting equipment, parts and bulbs” without limitation must be managed under a stewardship program.

BC EHF Table and EHF Information

EHFs in BC were last updated April 1, 2015. Product category definitions were last updated April 1st, 2016.

PRODUCT CATEGORY	FEE CATEGORY	EHF
Lamps	1. Fluorescent Tubes measuring ≤ 2 ft	\$0.20
	2. Fluorescent Tubes measuring > 2 ft and ≤ 4 ft	\$0.40
	3. Fluorescent Tubes measuring > 4 ft	\$0.80
	4. Compact Fluorescent Lights (CFL)/ Screw-In Induction Lamps	\$0.15
	5. Light Emitting Diodes (LED)	\$0.15
	6. High Intensity Discharge (HID), Special Purpose and other	\$1.10
	7. Incandescent / Halogen	\$0.05
	8. Miniature Bulb Package	\$0.10
Fixtures	9. Designated Small Fixtures / Decorative Light Strings	\$0.15
	10. Fixture Category A	\$0.15
	11. Fixture Category B	\$0.15
	12. Large Outdoor Fixtures	\$0.15
Ballasts	13. Ballasts/Transformers (not integrated into lamps or fixtures)	\$0.15

Fee Visibility: There are no restrictions or limitations on the display of EHF in BC. Manufacturers, retailers and wholesalers may include the recycling EHF in the product price or display it as a separate charge to purchasers.

Lamps: Program Definitions, Examples and Policies for BC

- Lamps come in a variety of brands, sizes, wattages, shapes, colour temperatures, base types, applications and technologies. Please report lamp sales based on the category definitions below.
- Lamps are commonly referred to as “bulbs” or “lights” by the public.
- Lamps are replaceable components/light sources designed to produce light from electricity, including replacement automotive and grow lamps.
- BC’s LightRecycle program includes the sale/supply to all sectors: residential, commercial, institutional and industrial through all distribution channels.
- EHF’s will be assessed on a per-unit basis EXCEPT for category #8, Miniature Bulb Package, which will be applied on a per-package basis.
- Refer to the [Multipacks Policy](#) for details on the EHF’s applied when multiple lamps are sold in one package.
- Refer to the [Integrated Lamps and Ballast Policy](#) for details on the EHF’s applied when lamps are sold integrated into fixtures.
- Refer to the [Aeronautical, Marine and Automotive Fixtures Policy](#) for details on the EHF’s applied for lamps sold in fixtures used in modes of transportation.

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
1. Fluorescent tubes measuring less than or equal to 2 ft	Includes all diameters and light outputs, shaped fluorescent tubes, and UV-A and UV-B tubes. 	\$0.20
2. Fluorescent tubes measuring greater than 2 ft and up to or equal to 4 ft		\$0.40
3. Fluorescent tubes measuring greater than 4 ft		\$0.80
4. Compact Fluorescent Lights (CFL)/ Screw-In Induction Lamps	Fluorescent bulbs that are typically similar in size and intended to replace an incandescent (traditional) light bulb, including pin-type sockets, covered CFLs and various output wattages. Includes screw-in induction lamps. 	\$0.15
5. Light Emitting Diodes	Solid-state lamps used for specialty purposes and conventional lighting applications. 	\$0.15
6. High Intensity Discharge (HID), Special Purpose and Other	Includes all HID technologies, such as High Pressure Sodium, Low Pressure Sodium (HPS), Mercury Vapour and Metal Halide, as well as UV-C / Germicidal lamps and tubes, Tubular Induction lamps (circular, square, U etc.), UHP replacement lamps (projector etc.), Neon replacement lamps, etc. 	\$1.10

CATEGORY	DESCRIPTION	EHF
7. Incandescent / Halogen	Filament lamps of all shapes, sizes and wattages (unless captured under Category 8) 	\$0.05
8. Miniature Bulb Package	Miniature bulbs are small, or very small bulbs. They can be LED, incandescent, halogen or neon and are typically designed and sold as replacement bulbs for applications such as: portable lighting (i.e., handheld flashlights), indicating, signaling, signage, emergency, electronic displays, automotive and transportation and decorative light strings/tape/ribbon/rope. Miniature bulbs are often sold in packages of two or more. Fees will be assessed on a per-package basis and NOT on a per-unit basis (as with all other lamp categories). Note: If miniature bulbs that meet this definition are sold individually and not in a package of two or more, the bulbs can be reported and assessed fees as if in packages in multiples of 10. For example, if in a reporting period, 41 single bulbs that meet this definition were sold individually, they would be reported as five “packages of 10” and assessed five fees. Some examples of common base types for miniature bulbs are provided below. Please note this list is not exhaustive. 	\$0.10

Fixtures: Program Definitions, Examples and Policies for BC

- Fixtures come in a variety of brands, sizes, wattages, shapes, materials, base types and applications. Please report fixture sales based on the definitions below.
- Fixtures can be referred to as “lamps” or “lights” by the public.
- Fixtures are electrical/electronic lighting equipment with a primary purpose to illuminate space, including hardwired, free standing, portable and solar-powered products.
- BC’s LightRecycle program includes the sale/supply to all sectors: residential, institutional, industrial and commercial through all distribution channels.
- EHF’s will be assessed on a per-unit basis on complete products (see excluded list below for more information).
- Fixtures sold with an integrated ballast(s) will be charged a fixture EHF and NOT a ballast EHF.
- Refer to the [Multipacks Policy](#) for details on the EHF’s applied when multiple fixtures are sold in one package.
- Refer to the [Integrated Lamps and Ballast Policy](#) for details on the EHF’s applied when lamps are sold integrated into fixtures.
- Refer to the [Aeronautical, Marine and Automotive Fixtures Policy](#) for details on the EHF’s applied for fixtures used in modes of transportation and examples of excluded and included product.

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
9. Designated Small Fixtures/ Decorative Light Strings	Book Lights (including Kindle Lights) 	\$0.15
	Snake Lights 	
	Bike Lights 	
	Flashlights*, Camping Headlamps, and Handheld Spotlights  *Multipacks containing both flashlights and power tools will not be charged a LightRecycle fee on the flashlight, but will be assessed fees on the applicable number of power tools under the CESA program.	
	Clamp Spotlights and Clip Lamps 	

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
9. Designated Small Fixtures/ Decorative Light Strings (continuedinued)	Lamp-holders (stand-alone and single lamp only) Refer to excluded list for further details on fixture parts. 	\$0.15
	Lanterns and Electric Candles 	
	Night Lights 	
	Single Remote Head for Track/Egress Lighting (including replacement heads). Fixed track systems are in Category 10 	
	Utility/Closet Lights (portable and battery powered only) 	

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
9. Designated Small Fixtures/ Decorative Light Strings (continued)	Floating/Submersible Lights for pools, ponds, bathtubs, etc. (portable and battery powered only) Note: Non-portable/battery powered pool/fountain fixtures are included in Category 11. 	\$0.15
	Puck/Disk Lights Compact lighting fixture used for cabinets or display lighting that contains the housing and lamp in a circular (round or oval) "puck" or "disk". May be surface mounted or recessed. Limited to those under 4 inches in diameter and 2 inches in depth. All other types of recessed/pot lights are captured in Category 10. 	
	Path/Walkway/Garden/In-Grade/Border/Step Lights (solar powered only). Non solar powered equivalents are included in Category 10. 	

CATEGORY	DESCRIPTION	EHF
9. Designated Small Fixtures/ Decorative Light Strings (continued)	Christmas Light Strings and Light Strings Products are reported and applied fees in increments of 100 lights. Products of 100 lights or less are applied one recycling fee. Products with greater than 100 lights are charged one recycling fee per 100 light increment. For example, a light string of 460 lights would be reported as 5 units and assessed five fees. 	\$0.15
	Rope/Strip/Ribbon/Tape Lights Products are reported and applied fees in increments of 10 metres. Products of 10 metres or less are applied one recycling fee. Products greater than 10 metres are charged one recycling fee per 10 metre increment (i.e., 38 metres of rope lights would be reported as 4 units and assessed four fees). Members may choose to calculate a fee rate/unit sold to apply at point of sale, and then bundle this into increments of 10 metres/\$0.15 for reporting purposes. 	
	Stake Lights (set of connected units) 	

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
10. Fixture Category A - Portable Fixtures with a plug, cord, or battery	Desk Lamps 	\$0.15
	Table Lamps 	
	Floor Lamps 	
	Portable Flood Lights 	
	Work Lights (including work string lights) 	

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
10. Fixture Category A - Emergency / Egress Lights	Emergency/Egress Lights. Does not include exit signs without attached light heads (refer to excluded list for further details.) 	\$0.15
10. Fixture Category A - Small Outdoor Fixtures	Bollard  Post Lighting (consumer applications only)  Path, Walkway, Garden, In-Grade, Border, Step Lights (non-solar powered only). Solar powered equivalents included in Category 9  Porch/Patio Lights. String lights included in Category 9. 	\$0.15

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
10. Fixture Category A - Small Outdoor Fixtures (continued)	Security Lighting (with or without integrated cameras) - Including residential-type security floodlights 	\$0.15
	Pool and Fountain Fixtures - Floating/Submersible lights (portable and battery powered only) for pools, ponds, bathtubs etc. are included in Category 9; linear pool and fountain fixtures are included in Category 11. 	
	Wall Mount/Small Flood - including commercial "wall packs" and flood lights less than 250 W 	

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
10. Fixture Category A - Decorative Fixtures	Flush/Semi-Flush 	\$0.15
	Lamp-holders (stand-alone and for more than one lamp) 	
	Pendant 	
	Recessed/Pot - Fee is only applied to the housing if housing and trims are sold separately. Refer to excluded list for more details on trims. Note: Puck/Disk lights are included in Category 9. See above for relevant definition. 	
	Fixed Track and Canopy - Replacement heads that are not integrated or attached to a track system are included in Category 9. Tracks without heads attached are not included. Refer to excluded list for more details. 	

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
10. Fixture Category A - Decorative Fixtures (continued)	Under Cabinet (including linear fluorescent types) - utility/closet lights (portable and battery powered) included in Category 9 	\$0.15
	Wall Mount (including sconces) 	
10. Fixture Category A - Chandeliers and Ceiling Fans	Chandeliers 	\$0.15
	Ceiling Fans with Lights - not including bathroom or ventilation fans 	

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
10. Fixture Category A - Linear Fixtures (including linear shop lights and linear pool/fountain fixtures) Under cabinet lights included in Category 10. Modular and custom built linear fixtures require 1 EHF for each lighting segment.	Strip Lights 	\$0.15
	Surfaced, Suspended, and Wall Mount 	
	Troffers (recessed and non-recessed) 	
	LED Panel Lighting (surfaced and suspended) 	

BRITISH COLUMBIA

CATEGORY	DESCRIPTION	EHF
11. Fixture Category B - Non-Linear Fixtures (commercial and industrial)	High/Low Bay Lighting 	\$0.15
	Parking Garage Fixtures (Ceiling and Wall Mount) 	
	Stage Lighting 	
12. Large Outdoor Fixtures Designed for use in institutional, commercial, and industrial settings	Area, Highway, Street, Post Lighting. Pole or arm mounted luminaries for sidewalk, street, highway, pathway or post-top lighting, including “shoeboxes” and “cobra heads”. Non consumer applications only. 	\$0.15
	Flood Lights and Sports Lights - (≥ 250 W) designed for use in sports fields, stadiums, arenas, tracks, courts, industrial yards, parking lots etc. Note: Smaller flood lights are captured by other categories (e.g., portable flood lights and residential-type security flood lights in Category 10) 	

BRITISH COLUMBIA

Ballasts/Transformers: Program Definitions, Examples and Policies for BC

Includes all brands, wattages and styles of ballasts and transformers for all fluorescent, HID, Low Voltage Incandescent and Neon lighting applications. Note that LED Drivers are excluded. Please report ballast/transformer sales based on the definitions below.

- The term ‘power supply device’ may denote a ballast, a transformer or a driver. Refer to product specifications to determine product type.
- Ballasts/transformers are a replaceable component designed to regulate or transfer the electrical current/energy in a lighting fixture.
- EHF’s will be assessed on a per-unit basis on lighting ballasts/transformers that are NOT integrated into lamps or fixtures.
- Fixtures sold with an integrated ballast/transformer will be charged a Fixture EHF and NOT a Ballast/Transformer EHF.
- Refer to the [Multipacks Policy](#) for details on the EHF’s applied when multiple Ballasts/Transformers are sold in one package.
- Refer to the [Integrated Lamps and Ballast Policy](#) for further details.

CATEGORY	DESCRIPTION	FEE
13. Lighting Ballasts/Transformers (not integrated into lamps or fixtures)	Ballasts, all types (i.e., compact fluorescent, electronic, HID, magnetic etc.) 	\$0.15

BRITISH COLUMBIA

Excluded Items for BC

The following products are exempt from EHF's and are not collected as part of BC's LightRecycle program.

Replacement lamps used in excluded fixtures and products should be charged EHF's and included in the program if they are sold separately and can be disposed of separately from the fixture or product.

"Light Containing" Products:

Products containing lights with a primary purpose that is not to illuminate or assist in the illumination of space are outside the scope of this program, including, but not limited to:

- Products covered by other schedules of the BC Recycling Regulation and for management in other product stewardship programs in BC. Examples include large appliances, small appliances, medical equipment and electronic products.
- Products containing lights with a primary purpose of signaling or displaying information. See below for detailed examples.

- | | | |
|--|---|--|
| 1. Alarms, phones and devices for the visually impaired | 17. Laser pointers and other laser products | 30. Decorative sculptures and statues with one or more integrated lights where the primary purpose of the product is decorative and the continued lights are designed to light the decoration itself and not to illuminate surrounding space |
| 2. Aquarium equipment | 18. Lava lamps | 31. Tanning beds |
| 3. Auto fixtures | 19. Light up shoes, hats, collars, and clothes | 32. Umbrellas with integrated lights |
| 4. Back lit signs | 20. Marine and aeronautical fixtures | 33. Vanity mirrors with lights |
| 5. Ventilation fans | 21. Mirror ball lights | 34. Watches |
| 6. Black light equipment | 22. Neon signs | 35. Holiday decorations (other than string lights and stake lights), such as jack-o-lanterns, decorative sculptures and plastic Santas |
| 7. Bug zappers | 23. Plasma balls | 36. Horticultural lighting fixtures such as greenhouse or grow lamp fixtures. |
| 8. Camera and video accessories | 24. Propane and gas powered lights | |
| 9. Electronic billboards | 25. Signaling equipment such as traffic lights and railway lights | |
| 10. Equipment to heat food | 26. Strobe lights | |
| 11. Equipment to warm animals (such as brooder fixtures) | 27. Sunshine simulators | |
| 12. Exit signs without light heads | 28. Trees (artificial, with integrated lights) | |
| 13. Fencing with integrated lights | 29. Medical, dental and veterinarian lighting equipment | |
| 14. Fountains with integrated lights | | |
| 15. Garlands with integrated lights | | |
| 16. Decorative key chains with integrated lights | | |

Fixture Parts:

Parts and accessories designed to be integrated into a complete fixture will not be charged an EHF. See below for examples. Note that stand-alone lamp holders, replacement heads for track lights and egress lighting, and housing for recessed lights are considered included products (refer to relevant categories above).

Examples of Fixture Parts that are not charged an EHF:

1. Table lamp sockets and replacement shades
2. Trim for recessed lights sold separately from housing
3. Lighting tracks without heads attached
Note: If heads are attached, product is classified as “fixed track” in category 10, heads sold separately are included in category 9
4. Lamp-holders for linear fixtures that are not stand-alone and must be integrated into a linear fixture
5. Light switches and continuedrols (such as dimmers and timers)
6. Replacement cords
7. Lighting posts sold separately from post top fixtures
8. LED drivers

MANITOBA

MANITOBA

The Manitoba LightRecycle program began on May 1, 2012 and includes residential-use fluorescent tubes and compact fluorescent lamps.

Manitoba Regulation

The Manitoba LightRecycle program was created by PCA pursuant to the requirements of Household Hazardous Material and Prescribed Material Stewardship Regulation issued under The Waste Reduction and Prevention Act ([C.C.S.M. c. W40](#)) and the draft Guideline for stewardship programs issued by Manitoba Conservation.

Lights for this program are covered under Section 2 (g) fluorescent lighting tubes and compact fluorescent lights category.

Manitoba EHF Table and EHF Information

EHFs in Manitoba are effective as of May 1, 2012. Product category definitions were last updated April 1, 2016.

PRODUCT CATEGORY	FEE CATEGORY	EHF
Lamps	1. Fluorescent Tubes measuring ≤ 2 ft	\$0.20
	2. Fluorescent Tubes measuring > 2 ft and ≤ 4 ft	\$0.40
	3. Fluorescent Tubes measuring > 4 ft	\$0.55
	4. Compact Fluorescent Lights (CFL)/ Screw-In Induction Lamps	\$0.15

Fee Visibility: There are no restrictions or limitations on the display of EHF in Manitoba. Manufacturers, retailers and wholesalers may include the recycling EHF in the product price or display it as a separate charge to purchasers.

Lamps: Program Definitions, Examples and Policies for Manitoba

- Lamps come in a variety of brands, sizes, wattages, shapes, colour temperatures, base types, applications and technologies. Please report lamp sales based on the category definitions below.
- Lamps are commonly referred to as “bulbs” or simply as “lights” by the public.
- Lamps are replaceable components/light sources designed to produce light from electricity.
- Manitoba’s LightRecycle program includes only residential sale and supply.
- EHFs will be assessed on a per-unit basis.
- Refer to the [Multipacks Policy](#) for details on the EHFs applied when multiple lamps are sold in one package.
- Refer to the [Integrated Lamps and Ballast Policy](#) for details on the EHFs applied when lamps are sold integrated into fixtures. Note that ballasts and fixtures are not part of the Manitoba LightRecycle program.

CATEGORY	DESCRIPTION	EHF
1. Fluorescent tubes measuring less than or equal to 2 ft	Includes all diameters and light outputs, shaped fluorescent tubes, and UV-A and UV-B tubes. 	\$0.20
2. Fluorescent tubes measuring greater than 2 ft and up to or equal to 4 ft		\$0.40
3. Fluorescent tubes measuring greater than 4 ft		\$0.55
4. Compact Fluorescent Lights (CFL)/ Screw-In Induction Lamps	Fluorescent bulbs that are typically similar in size and intended to replace an incandescent (traditional) light bulb, including pin-type sockets, covered CFLs and various output wattages. Includes screw-in induction lamps. 	\$0.15

QUEBEC

QUEBEC

The Quebec RecycFluo Program started on July 14, 2012 and began collecting EHF's from members on October 1, 2012. The program includes all mercury-containing lamps sold separately, including sales to the residential, industrial, commercial and institutional sectors. On October 1, 2013, the program expanded to include all component mercury-containing lamps sold integrated into lighting fixtures and automotive applications.

Quebec Regulation

The Quebec RecycFluo Program was created by PCA according to the Regulation respecting the recovery and reclamation of products by enterprises ([Chapter Q-2, r. 40.1](#)).

Section 35 lists the products covered by the Regulation, that is, all marketed lamps containing mercury, without exception, whether used by a residential or an ICI customer base. Mercury lamps are grouped together according to three subcategories:

1. "Fluorescent tubes", that is, tubular lamps containing mercury, equipped with a pin base, whether linear or non-linear, i.e. including tubes that are circular, square or other.
2. "Compact fluorescent lamps", that is, lamps in the shape of a miniaturized tube, sometimes twisted, containing mercury. They come in a wide variety of shapes and sizes, are equipped with either a screw base or integrated ballast, or with a pin base (without ballast). Their most common use is indoor residential lighting. Lamps equipped with an integrated ballast (screw base) are very popular and designed to directly replace incandescent lamps. Compact fluorescent lamps are often called "light bulbs" or "compact fluorescent light bulbs (CFL)".
3. "Any other type of lamp", that is, all other types of lamps containing mercury such as High Intensity Discharge (HID) lamps that include, but not limited to: High Pressure Sodium (HPS), Mercury Vapour and Metal Halide, as well as UV lamps, UV tubes, Tubular Induction lamps (circular, square, U, etc), Germicidal, UHP replacement lamps (projector etc.), neon replacement lamps, etc.

Quebec EHF Table and EHF Information

EHFs in Quebec are effective as of October 1, 2012. Product category definitions were last updated April 1, 2016.

PRODUCT CATEGORY	FEE CATEGORY	EHF
Lamps	1. Fluorescent Tubes measuring ≤ 2 ft	\$0.30
	2. Fluorescent Tubes measuring > 2 ft and ≤ 4 ft	\$0.50
	3. Fluorescent Tubes measuring > 4 ft	\$1.00
	4. Compact Fluorescent Lights (CFL)/ Screw-In Induction Lamps	\$0.20
	5. High Intensity Discharge (HID), Special Purpose and Other	\$1.10

Fee Visibility: There are restrictions on the display of EHF's in Quebec. Manufacturers, retailers and wholesalers are required to internalize the EHF in the product price. The Ministry of Développement Durable, Environnement et Lutte contre les Changements Climatiques (MDDELCC) has posted [examples of accepted and prohibited EHF display](#).

Lamps: Program Definitions, Examples and Policies for Quebec

- Lamps come in a variety of brands, sizes, wattages, shapes, colour temperatures, base types, applications and technologies.
- Please report lighting sales based on the category definitions below.
- Lamps are commonly referred to as “bulbs” or simply as “lights” by the public.
- Lamps are replaceable components/light sources designed to produce light from electricity, including replacement automotive lamps.
- QC’s RecycFluo program includes the sale/supply to all sectors: residential, institutional, industrial and commercial through all distribution channels.
- Refer to the [Multipacks Policy](#) for details on the EHF’s applied when multiple lamps are sold in one package.
- Mercury containing lamps sold integrated into a lighting fixture or an automotive application are included in the program and must be removable by the end user.

CATEGORY	DESCRIPTION	EHF
1. Fluorescent tubes measuring less than or equal to 2 ft	Includes all diameters and light outputs, shaped fluorescent tubes, and UV-A and UV-B tubes. 	\$0.30
2. Fluorescent tubes measuring greater than 2 ft and up to or equal to 4 ft		\$0.50
3. Fluorescent tubes measuring greater than 4 ft		\$1.00
4. Compact Fluorescent Lights (CFL)/ Screw-In Induction Lamps	Fluorescent bulbs that are typically similar in size and intended to replace an incandescent (traditional) light bulb, including pin-type sockets, covered CFLs and various output wattages. Includes screw-in induction lamps. 	\$0.20
High Intensity Discharge (HID), Special Purpose and Other	Includes all HID technologies that contained mercury, such as High Pressure Sodium (HPS), Mercury Vapour and Metal Halide, as well as UV-C / Germicidal lamps and tubes, Tubular Induction lamps (circular, square, U, etc.). UHP replacement lamps (projector etc.), neon replacement lamps, etc. 	\$1.10

PRINCE EDWARD ISLAND

PRINCE EDWARD ISLAND

The Prince Edward Island (PEI) LightRecycle program began on April 1, 2015 and includes all lamp technologies used in residential, commercial, institutional and industrial applications, but excludes lighting fixtures.

PEI Regulation

The PEI LightRecycle Program was created by PCA pursuant to the requirements of the Environmental Protection Act ([R.S.P.E.I. 1988, Cap. E-9](#)) Materials Stewardship and Recycling Regulations.

The Regulation includes all lamp technologies regardless of the type of user (i.e., residential and IC&I lamps are all included).

Under Section 46 “lamp product” means a light source designed to produce light from electricity including, but not limited to:

- (i) fluorescent tubes,
- (ii) compact fluorescent lamps,
- (iii) high-intensity discharge lamps,
- (iv) incandescent lamps and
- (v) light-emitting diode lamps

PEI EHF Table and EHF Information

EHFs in PEI are effective as of April 1, 2015. Product category definitions were last updated April 1, 2016.

PRODUCT CATEGORY	FEE CATEGORY	EHF
Lamps	1. Fluorescent Tubes measuring ≤ 2 ft	\$0.30
	2. Fluorescent Tubes measuring > 2 ft and ≤ 4 ft	\$0.50
	3. Fluorescent Tubes measuring > 4 ft	\$1.00
	4. Compact Fluorescent Lights (CFL)/ Screw-In Induction Lamps	\$0.20
	5. Light Emitting Diodes (LED)	\$0.15
	6. High Intensity Discharge (HID), Special Purpose and Other	\$1.10
	7. Incandescent / Halogen	\$0.05
	8. Miniature Bulb Package	\$0.10

Fee Visibility: According to section 54 of the Regulation “No retailer shall charge a consumer any separate EHF with respect to the costs associated with implementing or operating a lamp product stewardship plan.” (EC349/14)

PRINCE EDWARD ISLAND

Lamps: Program Definitions, Examples and Policies for PEI

- Lamps come in a variety of brands, sizes, wattages, shapes, colour temperatures, base types, applications and technologies. Please report lighting sales based on the category definitions below.
- Lamps are commonly referred to as “bulbs” or simply as “lights” by the public.
- Lamps are replaceable components/light sources designed to produce light from electricity, including replacement automotive lamps and grow lamps.
- PEI’s LightRecycle program includes the sale/supply to all sectors: residential, institutional, industrial and commercial through all distribution channels.
- EHFs will be assessed on a per-unit basis EXCEPT for category #8, which will be applied on a per-package basis.
- Refer to the [Multi-Pack Policy](#) for details on the EHFs applied when multiple lamps are sold in one package.
- Refer to the [Integrated Lamps and Ballast Policy](#) for details on the EHFs applied when lamps are sold integrated into fixtures. Note that ballasts and fixtures are not part of the PEI LightRecycle program.

CATEGORY	DESCRIPTION	EHF
1. Fluorescent tubes measuring less than or equal to 2 ft	Includes all diameters and light outputs, shaped fluorescent tubes, and UV-A and UV-B tubes. 	\$0.30
2. Fluorescent tubes measuring greater than 2 ft and up to or equal to 4 ft		\$0.50
3. Fluorescent tubes measuring greater than 4 ft		\$1.00
4. Compact Fluorescent Lights (CFL)/ Screw-In Induction Lamps	Fluorescent bulbs that are typically similar in size and intended to replace an incandescent (traditional) light bulb, including pin-type sockets, covered CFLs and various output wattages. Includes screw-in induction lamps. 	\$0.20

PRINCE EDWARD ISLAND

CATEGORY	DESCRIPTION	EHF
5. Light Emitting Diodes	Solid-state lamps used for specialty purposes and conventional lighting applications 	\$0.15
6. High Intensity Discharge (HID), Special Purpose and Other	Includes all HID technologies, such as High Pressure Sodium (HPS), Low Pressure Sodium, Mercury Vapour and Metal Halide, Tubular Induction lamps (circular, square, U, etc.), UHP replacement lamps (projector etc.), neon replacement lamps, etc. * Please note: UV / Germicidal Lamps and Tubes (UV-C) are excluded form the PEI LightRecycle Program. 	\$1.10
7. Incandescent / Halogen	Filament lamps of all shapes, sizes and wattages (unless captured under category 8) 	\$0.05

PRINCE EDWARD ISLAND

CATEGORY	DESCRIPTION	EHF
8. Miniature Bulb Package	Miniature bulbs are small, or very small bulbs. They can be LED, incandescent, halogen or neon and are typically designed and sold as replacement bulbs for applications such as: portable lighting (i.e., handheld flashlights), indicating, signaling, signage, emergency, electronic displays, automotive and transportation and decorative light strings/tape/ribbon/rope. Miniature bulbs are often sold in packages of two or more. Fees will be assessed on a per-package basis and NOT on a per-unit basis (as with all other lamp categories). Note: If miniature bulbs that meet this definition are sold individually and not in a package of two or more, the bulbs can be reported and assessed fees as if in packages in multiples of 10. For example, if in a reporting period, 41 single bulbs that meet this definition were sold individually, they would be reported as 5 “packages of 10” and assessed 5 fees. Some examples of common base types for miniature bulbs are provided below. Please note this list is not exhaustive. 	\$0.10

POLICIES

POLICIES

Multipacks Policy

Lamps:

The following policy applies to: BC, Manitoba, Quebec and PEI

Lamp EHF's are assessed on a per-unit basis excluding Miniature Bulb Packages (where applicable). Where multiple lamps are sold in one package, the EHF's are additional based on the EHF per unit that would be charged.

Example: A package of four CFLs is levied four CFL EHF's.

Policy Exception - Category 8: Miniature Bulb Packages (Miniature Bulbs included in BC and PEI programs only)

Packages of two or more miniature bulbs are assessed EHF's on a per-package basis (up to 10 units) and not on a per-unit basis, as with all other lamp categories. This policy exception only applies to provinces where Miniature Bulb Packages are included as part of the program.

Example: A package of eight miniature bulbs is levied one miniature bulb package EHF.

Fixtures:

The following policy applies to: BC

Fixture EHF's are assessed on a per-unit basis for stand-alone fixtures except for Track Lights, Linear Fixtures (BC Category 10) and Large Outdoor Fixtures (BC category 12). Where multiple stand-alone fixtures that are not designed to be wired together or integrated into a complete fixture are sold in one package, the EHF's are additional based on the EHF per unit that would be charged.

Example 1: A package of four flashlights is charged four Designated Small Fixtures EHF's.

Example 2: A package of two table lamps is charged two Fixture category A EHF's.

Example 3: A Christmas light string set of 40 lights is charged one Decorative Light String EHF.

Example 4: A wall mount fixture with four integrated sconces is charged one Fixture category A EHF.

Track Lights – Remote Heads and Fixed Track Fixtures (Fixture category A)

A fixed track fixture with attached or integrated track heads is levied one Fixture category A EHF. Remote heads for track light systems that are not sold attached or integrated into a fixed track fixture are levied a per-unit Designated Small Fixture EHF on each head. Lighting tracks without attached heads are not levied an EHF.

Linear Fixtures (Fixture category A)

Where multiple linear fixtures (e.g., troffers, strip lights etc.) are sold and/or designed to be incorporated into a single "run," each individual linear fixture divided by a point of disassembly (i.e., seam) is assessed a separate EHF, regardless of whether the run is designed to look "seamless".

Example: Six troffers (Fixture category A) are sold to be incorporated into a single run, divided by 5 points of disassembly (i.e. seams). Six Fixture category A EHF's are levied.

Large Outdoor Fixtures

Fixtures meeting the definitions of Large Outdoor Fixtures are levied a per-unit EHF on each fixture head, regardless of whether they are sold with, or attached to, a lighting post or cross arm. Posts and cross arms sold separately are not levied EHF's.

POLICIES

Ballasts/Transformers:

The following policy applies to: BC

Ballast/transformer EHF's are assessed on a per-unit basis. Where multiple ballasts or transformers are sold in one package, the EHF's are additional based on the EHF per unit that would be charged.

Example 1: A package of two ballasts is levied two Ballast/Transformer EHF's.

Example 2: A package of two transformers is levied two Ballast/Transformer EHF's.

Integrated Lamps & Ballasts Policy

Integrated Lamps:

The following policy applies to: BC, MB, PEI

When applying this policy in Manitoba and Prince Edward Island, only apply a lamp EHF as fixtures are not covered under the Manitoba and PEI LightRecycle Programs.

The following fixture type and lamp combinations sold with one or more integrated and replaceable lamps will be charged a fixture EHF and the relevant number of applicable lamp EHF's, regardless of the channel of distribution:

- Linear Fixtures, classified in Fixture category A sold with one or more integrated and replaceable Linear Fluorescent Tubes
- Area, Highway, Street and Post Lighting, classified in the Large Outdoor Fixtures Category sold with one or more integrated and replaceable HID or other lamps.

All other fixture types and fixture/lamp combinations (including all other Fixture types in Fixture Category A and Large Outdoor Fixtures e.g., flood/sport lights) will be charged a Fixture EHF and NOT a Lamp EHF in cases where the fixture/lamp(s) are sold as a single unit, as supplied by the Original Equipment Manufacturer (OEM), regardless of the channel of distribution.

Example 1: A linear troffer is sold without integrated fluorescent tubes.

In BC, one Fixture Category A EHF is applied.

In MB and PEI, no EHF is applied.

Example 2: A linear troffer is sold with four integrated and replaceable 4 ft. fluorescent tubes.

In BC, one Fixture Category A EHF and four 4 ft. Fluorescent Tube EHF's are applied.

In MB and PEI, four 4 ft. Fluorescent Tube EHF's are applied.

Example 3: A highway "cobra head" light is sold without an integrated HID lamp.

In BC, one Large Outdoor Fixture EHF is applied.

In MB and PEI, no EHF is applied.

Example 4: A highway "cobra head" light is sold with one integrated and replaceable HID lamp.

In BC, one Fixture Category A EHF and one HID EHF is applied.

In MB and PEI, one HID EHF is applied.

POLICIES

Integrated Ballasts:

The following policy applies to: BC

Fixtures sold with an integrated ballast will be charged a Fixture EHF and not a Ballast EHF.

How to Report and Remit EHF on Fixtures with Integrated Lamps (if above policy applies):

PCAs / ReGeneration's online EHF reporting system requires each member to file monthly sales reports, which generates an invoice that must be paid by the member. This requires the member to input the total number of units of each of the product categories that were sold/supplied during the reporting period.

Fixtures sold with one or more integrated lamps that are charged both a fixture EHF and one or more lamp EHF are unique in that different product categories are sold as one "unit." Members may have different IT or manual systems to assign unique EHF to these products that equate to the applicable number of lamps and fixture EHF, in order to recoup the full amount of money from the customer that must be remitted to the program.

Where possible, members are encouraged to "separate" these products for the purposes of online EHF reporting and report the applicable products separately as fixtures and lamps. As per example 4 above, a highway "cobra head" sold with an integrated HID lamp should be reported separately as one Large Outdoor Fixture unit and one HID unit.

If a member's IT or manual system for tracking EHF does not allow applicable fixtures sold with integrated lamps to be reported separately in this manner, the member may "over report" the applicable number of fixture units in the relevant fixture category that equates to the same total amount paid. The member can determine the number of fixture units they should report by dividing the total amount of money owed for the combination of products by the EHF rate for the fixture category. Relevant details should be reported in the methodology section of the sales report to explain how the number of units was calculated. The member should keep a copy of all relevant fee records on file for future audits.

Note: The methodology explained in this section should only be used if a member is unable to "separate" these products for the purposes of online fee reporting, as described above, which is the preferred and recommended approach.

Aeronautical, Marine and Automotive Fixtures Policy

The following policy applies to: BC

Excluded Fixtures:

Fixtures designed to be integrated into a mode of transportation are excluded from the program if the primary purpose is navigation, navigational safety, signaling or displaying information. These are defined as light-sources that are integrated into a protective lens and/or housing and designed to function as stand-alone or replacement lighting products to permit the transportation device to safely navigate to its destination.

Fixtures exclusively designed to illuminate space within one or more types of transportation are also excluded from the program. For example, fixtures designed to light the interior of an automobile or automobile trunk are excluded.

NOTE: Examples of Modes of Transportation are airplanes, boats, trains, automobiles, trucks and trailers with permanently affixed wheels. Land-based mobile housing, office or container units without permanently affixed wheels are not considered to be a mode of transportation.

POLICIES

Examples of Excluded Fixtures:

Category	DESCRIPTION
Headlights with a built in protective lens or housing:	
Decorative / Accessory Lighting:	
Safety / Trailer / Tail / Identification Lights:	

Included Fixtures:

Fixtures that are not exclusively designed to illuminate space within a mode of transportation, and that otherwise meet the definition of included fixtures, are included in the program in the relevant fixture category. For example, if a fixture is sold for the purpose of integration into a mode of transportation but is otherwise indistinguishable from an included fixture sold to illuminate space in a non-transportation based setting (e.g., commercial building), it is included in the program. As an example, fluorescent fixtures that, once sold, can either be integrated into a commercial building or into a trailer are included in the program.

Replacement automotive bulbs that do not include a protective lens or housing that collectively functions as a complete fixture or headlight are included in the program in the relevant lamp category.
