Manitoba Paint Collection Site Guidelines

October 2018

1. INTRODUCTION

The Collection Site Guidelines are intended to provide practical guidance to operators who will be participating as Collection Sites in the Manitoba Paint Recycling Program (the "Program"). These guidelines are not intended to replace any Provincial and Federal regulations standards, acts or regulations nor relieve the operator of any obligations under the regulations.

Product Care Association (PCA) accepts no responsibility and assumes no liability arising from the use of the information contained in this publication.

Background Information

The Household Hazardous Material and Prescribed Material Stewardship Regulation under the Waste Reduction and Prevention (WRAP) Act, requires brand owners of certain types of paint to operate a province wide paint recycling program to manage post consumer leftover paint. PCA is the non-profit industry association which has developed, and will operate, the Program on behalf of the paint brandowners.

PCA has contracted with local government, paint retailers and other businesses, such as Green Depots, to act as collection sites for consumers to return leftover paint.

2. PRODUCTS ACCEPTED

The Program includes <u>architectural paint (household paint)</u> in containers under 25L in size, and <u>all paint aerosol</u>, (automotive, industrial etc.). There are two major types of architectural (household) paints sold to consumers: latex or water-based paints and alkyd or solvent-based paints. Both types are accepted by the program regardless of the sheen/gloss or finish, solid or transparent.

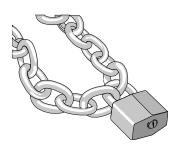

The Program accepts leftover paint from any category of paint consumer including:

- o Homeowners
- Commercial painters
- o Businesses

See Appendix A: Products Accepted/Not Accepted

3. COLLECTION SITE OPERATIONS

3.1 Collection Site Security

During normal business hours, only staff members should have access to the collection bins/drums.

When the Collection Site is closed or not attended, the collected paint must be secured or locked inside the premises so that it is not accessible by animals or other people.

3.2 Collection Site Supplies

The Program will supply the following to the paint collection facility:

- 1. Collection Site guidelines.
- 2. Collection Site signage.
 - Entrance sign or poster to inform consumers that the premises are a Program Collection Site.
 - Product information sign to inform staff and customers what products are accepted and not accepted.
- 3. Two or more collection bins (photo at left) for paint containers.
- 4. One 205 L (45 gallon) drum for paint aerosols.
- 5. One spill kit.
- 6. Waiver stickers to be used for the Paint Exchange (if applicable).

3.3 Receiving Leftover Paint from Consumers

Important: Never open the container or allow the container to be opened by the consumer.

- Examine the container to ensure that:
 - The product is included in the Program refuse any unacceptable products and explain that the Program only covers specific paints.
 - The container is properly sealed.
 - The container is properly labelled.

If the paint is suitable for the Paint Exchange program place it on Paint Exchange shelving (see Paint Exchange section).

Storing products correctly:

- Immediately place the paint container inside the bin
 - place 5 gallon pails in the bottom of the bin
 - all containers should be packed upright and tightly together
- Pack paint aerosols into the 205 L drums.
- Do not overfill bin or drum.
- Replace the lid on the bin or drum.

3.4 Shipment Procedures

► Arranging for shipment:

To order a pick-up, please contact Miller, using the attached pickup request form and indicate:

- Your collection site/company name and location.
- The number of bins or drums for pickup.
- Additional supplies required (labels etc.).

A pick-up should be ordered when:

- If you have 2 bins, call when one bin is full. If you have more than two bins, call when more than half of your bins are full, or
- The paint aerosol drum is nearly full.

The transporter will provide:

- Replacement tubskids/drums and supplies, as requested.
- Labels to apply to the full tubskids/drums
- Transportation of Dangerous Goods (TDG) labels to be applied to the replacement tubskid or drum before use.
- Shipping document for you to sign.
- ► Preparation for shipment:
 - Ensure the lid of the collection container is secure.
 - Ensure that the collection container has the proper TDG label affixed.
 - Sign the shipping document provided by the transporter.
 - If your shipment is being picked up by a third party transporter, additional shipment instructions will be provided for paperwork. A copy of these instructions is included at the end of this manual.

4. DOCUMENTATION

- Monthly Collection Site inspection form Collection Sites are to complete a monthly Collection Site inspection form (Appendix B).
- ► Paint Exchange form (not applicable to retail sites) fax the form to PCA at 1-866-975-2982 (toll free) or scan/email it to <u>lori@productcare.org</u> at the end of every month (Appendix C).
- Copies of completed shipping documents (provided by the transporter) should be kept by the Collection Site for two years.

5. PAINT EXCHANGE

The Paint Exchange program displays and offers selected containers of leftover paint to consumers free of charge. All Collection Sites except paint retailer sites can offer the Paint Exchange program to the public. The Paint Exchange shelving should be placed in a location that is easily accessible to customers.

- Selecting containers for the Paint Exchange program:
 - <u>No aerosols</u> aerosols must not be given away through the paint exchange.
 - Based on the weight of the container, select containers that are >50% full (<u>do not</u> open container).
 - The colour of the paint should be indicated on the container or label.
 - Select containers with original labels.
 - Select containers in good condition with no rust or damage.
 - Shake container to ensure its contents are still liquid.

Place selected containers on Paint Exchange display shelving.

► Signing out Paint Exchange containers:

Because the paint given away in the Paint Exchange program is a used product, certain procedures must be followed:

- Attach a waiver sticker to top of container, once the customer selects the paint.
- The customer must read and complete Paint Exchange form (Appendix C).

Additionally, the Collection Site must complete the details on the bottom of the Paint Exchange form(s) at the end of every month and fax the form(s) to PCA at 1-866-975-2982 (toll free) or scan/email it to <u>lori@productcare.org</u>.

6. HEALTH & SAFTY

You are responsible for ensuring that your facility and operations, including paint collection activities, meet the requirements of Workers Compensation Board (WCB).

- ► The following are some general safety guidelines related to the Program:
 - No smoking near paint collection and storage area.
 - Do not open paint containers.
 - Do not accept improperly sealed containers or unknown materials.
 - Do not accept non-program materials.
 - Read the label on each container.
 - Wash hands before eating, smoking or using the washroom.
 - o Follow the procedures outlined in these guidelines
- Depending on the type of paint, the label may display warning or hazard symbols. The following are some common product hazard symbols found on paint containers.

Poison Hazard

This symbol is a warning that the product could be poisonous if you inhale its vapours, if you accidentally swallow it or if it makes contact with your eyes or skin.

Avoid breathing vapours, ingestion and skin contact.

Explosive Hazard

A compressed gas is a product whose contents are under pressure, for example, an aerosol can.

Always handle and store the product carefully. It may be dangerous if the container is accidentally heated, punctured or crushed.

Flammable/Combustible Hazard

Solvent-based paint typically contains flammable or combustible ingredients, which means these materials will ignite and continue to burn if exposed to a flame or source of ignition.

Avoid breathing fumes, build-up of vapours, open flame, spark or heat, ingestion and skin contact

Toxic Hazard

This symbol is a warning that the product could be toxic or poisonous if you accidentally swallow it or if it touches your eyes or skin.

Avoid ingestion and skin contact.

7. IN THE EVENT OF A SPILL

Each Collection Site is provided with a spill kit. Be sure that the kit contains all of the supplies that were originally provided and ensure that it is accessible at all times.

Important: Respond quickly to a spill so that the spilled paint does not harm the environment or present a risk of personal injury.

Spill Response Procedures:

- Ensure personal safety if the spill involves solvent based paints, ensure proper ventilation and that there is no source of ignition. Put on the protective gear provided in the spill kit.
- Secure the area restrict entry into the spill area, only allow access to the personnel controlling the spill.
- Stop the flow of paint place the spilling container upright or in a position to minimize the spill or place something under it to catch the spill.
- Contain the spill area if necessary, cover drains and/or place barriers to contain the spill within a small area.
- Clean up the spill capture the spilled material using the absorbent material provided, and then place the used absorbent material in plastic bags together with any used spill control supplies, contaminated protective clothing and cleaning materials. Seal the bags and place them in the collection bin for disposal.

Remove any clothing that may be contaminated. Wash thoroughly to remove spilled material from your hands or body. Replenish any used spill control supplies.

- Report the spill report the spill immediately if the spill:
 - is larger than 2 gallons or
 - o escapes containment and enters the environment or
 - o results in an injury

To report the spill, contact PCA at 1.877.592.2972. For all spills, complete the Emergency and/or Incident Report (Appendix D) recording the details of the spill and fax it to the PCA program office immediately at 1-866-975-2982 (toll free).

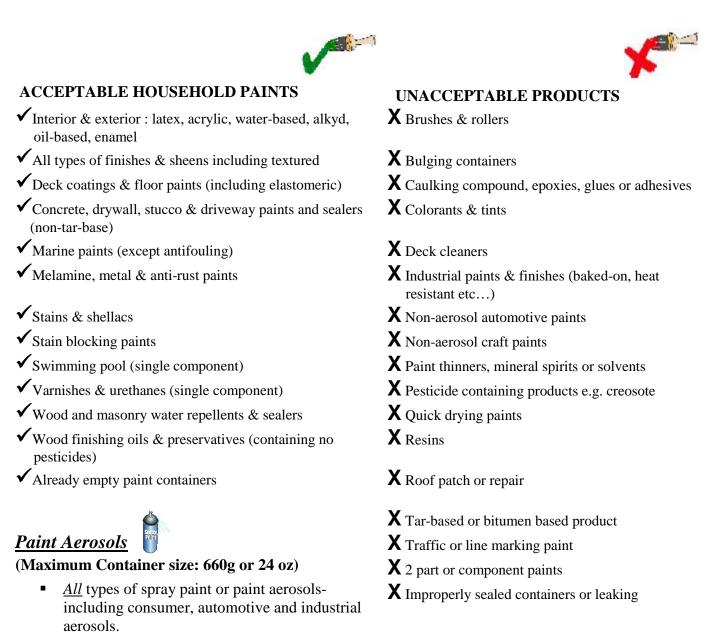

PRODUCTS ACCEPTED/NOT ACCEPTED (appendix A)

Architectural (Household) Paints

are accepted.

(Maximum Container Size: 25 Litres)

- All containers must be properly sealed, labeled and in original container.
- Full, partially full and empty containers are acceptable.

Already emptied, partially full or full containers **X** Unidentifiable or unlabelled containers
