Appendix 1

DEFINITIONS
PRODUCT CARE PAINT PLUS – DEFINITIONS

- **Abandoned** - products left at the depot after hours or left without the operator’s permission
- **Aerosols** - products that are in a container under pressure, like “bug spray”
- **Appendix** - information in the back of this manual
- **Bill of Lading** – A shipping document that is used to keep track of products removed from the depot
- **Consumer Product Label** - a label having special information and found only on consumer products
- **Dangerous Goods** - goods that are managed under special laws because they are hazardous
- **Exposure** - contact with a product
- **Flammable Liquid** - one of the consumer products accepted under this program
- **Gasoline** – one of the consumer products accepted under this program
- **Impervious** - cannot pass liquid through it
- **Non-Hazardous Concentration** - a safe level where you do not need to wear protection
- **Personal Protective Equipment** - special safety gear worn to protect against exposure to a product
- **Pesticide** - one of the consumer products accepted under this program
- **Product Care Storage Room** - a specially constructed room for safely storing collected products
- **Registration Number** - a number found on pesticide container labels and with the letters “PCP” on it
- **Regulated Domestic Product** - a product sold to the public (i.e., not a commercial product)
- **TDG** - “Transportation of Dangerous Goods” (See “dangerous goods”)
- **Tote** - a special container provided by this program for carrying and storing products
- **Tubskid** - a special leak-proof container for storing collected product in the storage room
- **ULC Container** - a red container that is specially designed to carry gasoline safely
- **Ventilated** - providing fresh air with air vents and, if indoors, with an electric fan
- **Workers Compensation Board (WCB)** - the government agency regulating safety in the workplace (also known as Worksafe BC)
Appendix 2

MONTHLY DEPOT INSPECTION CHECKLIST
# MONTHLY DEPOT INSPECTION CHECKLIST

**MONTH** __________________________ **YR** ____________

*Please mark each box - Check (√) if Okay or Cross (X) if Attention Needed*

## PAINT DEPOT & PAINT PLUS DEPOT:

| ☐ Tubskids & lids are in good condition. | ☐ Total Number of tubskids on site (write) ____________  
(please include ALL tubs on site in this total) |
| ☐ Spill Kits complete and ready for use. | ☐ ‘Authorized Depot’ & ‘We Accept/Don’t Accept’ signs are clean, in place and readable. |
| ☐ All current staff have been trained and tested. | ☐ Training Manuals are available to staff. |
| ☐ Collection area is clean and organized | ☐ Depot is locked and secured after hours. |
| ☐ Program Brochures available. | |

## PAINT PLUS DEPOTS WITH MULTI-BIN(S):

| ☐ No Smoking sign is clean, in place and readable. | ☐ Drum attachment lock is working properly and in locked position. |
| ☐ No cracks or holes are visible in the tubskid lids and sides. | ☐ Lock on multi-bin lid is working properly and key available. |
| ☐ Ramp is in good condition (where applicable). | ☐ Lock on drum attachment opening lid is working properly and key available. |
| ☐ There are 6 (six) Rubbermaid totes at the depot. | ☐ Fire extinguisher is properly mounted near multi-bin, charged and ready for use. |
| ☐ There are 1-3 totes in the reception area (if applicable). | ☐ Spill kit is complete and unused. |
| ☐ There are a minimum of 6 (six) unused bags of absorbent. | ☐ Safety goggles and chemical resistant gloves are available. |
| ☐ Gasoline vouchers on hand. | ☐ Multi-Bin Collection Unit is in good operating condition |
| ☐ Eyewash station filled and eyewash bottle filled | |

## FLAMMABLE/PESTICIDE TUBSKID PACKAGING:

| ☐ Solvent tubskid is properly sorted | ☐ Glass and fragile containers are packed with absorbent in totes. |
| ☐ Pesticide tubskid/drum is properly sorted. | ☐ Products in all tubskids/drums are packed tightly and upright. |
| ☐ Gasoline containers are placed upright in the bottom of the solvent tubskid. | ☐ Aerosol cage/drum is properly secured. |

*Please provide comments on the above items that have a cross (X) and list any items you need:*

PAINT EXCHANGE FORM
PAINT EXCHANGE PROGRAM

The Paint Exchange program allows consumers to take paint away from the depot free of charge for reuse. Consumers must be made aware that the paint is on a “AS IS” basis and we can not guarantee quality. They are to read the Paint Exchange form prior to signing it as it is a Release Form. A Waiver/Liability Release sticker must be placed on each container the consumer takes. No opening of any container is allowed.

Because most of the forms are faxed – whenever possible:
- Please print
- Please use blue pen
- Please stop writing when the lines are used up. It’s okay to start a new form even if it’s only for 1 person

INSTRUCTIONS FOR PAINT EXCHANGE PROGRAM:

1. Print the Depot name and full mailing address. Please see sample of completed form on second page.

2. After the consumer has chosen what paint they will be taking, while you are putting on the Waiver/Liability Release Sticker on every container that goes out, please have the customer complete the Monthly Paint Exchange Form by:

3. They print the date they are taking the paint

4. They print their name or their organization’s name and then write their signature.

5. They print their phone number or the phone number of their organization

6. Sort out the sizes of the containers – 5 gallon or 1 gallon so that you can complete the Quantity section of the form. We are only tracking 1 gallon or larger sizes. If the container size is smaller than 1 gallon there is no need to record it. Only write down the size of the container – do not estimate what the contents are.

7. Determine if the paint is Latex (Water Based) or Alkyd (Oil Based)

8. If the paint is Latex, write the number of containers being taken in the correct column. For example, if 3 – 5 gallon containers and 6 – 1 gallon containers are being taken then in the 5 gal column write 3 and in the 1 gal column write 6.

9. If the paint is Alkyd, write the number of containers being taken in the correct column. For example, if 2 – 5 gallon containers and 8 – 1 gallon containers are being taken then in the 5 gal column write 2 and in the 1 gal column write 8.

10. At the end of the page, add up the total number of containers and write this number in.

11. At the end of each month the Monthly Paint Exchange Form is sent to Product Care’s office is Surrey, BC and must be received by the 10th of the month.
# MONTHLY PAINT EXCHANGE FORM

**THIS DOCUMENT IS A LIABILITY RELEASE FORM – PLEASE READ IT CAREFULLY**

TO:  
Product Care Association

AND TO:  
Deport Owner/Operator – Depot Name and Address (Full Mailing Address)

- I confirm that the product (the “Product”) received by me today is offered as part of a free “Paint Exchange.” I also acknowledge that Product Care, the Depot Owner/Operator and all other organizers, sponsors and contractors of the Paint Exchange (collectively the “Sponsors”) make NO REPRESENTATION OR WARRANTY AS TO THE MERCHANTABILITY, QUALITY, CONTENTS OR ORIGINS OF THE PRODUCT OR TO THE FITNESS OF THE PRODUCT FOR ANY PURPOSE.

- I accept the Product “as is” and I acknowledge that the Product has not been inspected by any of the Sponsors. I ACCEPT ALL RISKS ASSOCIATED WITH ANY USE OF THE PRODUCT WHATSOEVER. In consideration for the Product, I release the Sponsors from all claims, damages, causes of action, or actions arising from the receipt and/or use of the Product. I am aware that by signing this release, I am waiving all legal rights against the Sponsors in relation to the acceptance and use of the Product.

- The term “Product Care” as used in this release includes the Product Care’s members, officers, directors, employees, agents and contractors.

- I acknowledge that if I have any reason to suspect that the Product has been altered in any way or that the contents are not represented by the original label information, I should not use the Product and I may return it to any Product Care Authorized Paint Collection Depot at my own expense, without charge.

This quiz lets you see how much you have learned by reading the manual. There may be more than one correct answer to each question. **Circle the best answer**, for example. If you do not know an answer, look it up in the manual. When you finish, give the quiz to the depot operator to discuss any mistakes you may have made.

1. **This program is called the**
   a. Product Care Stewardship Program  b. Recycling Program  
   c. Industrial Products Program  d. Provincial Waste Collection Program

2. **Customers can help protect our environment by**
   a. Not using products that are harmful to the environment or using less harmful ones  
   b. Reducing the amount of products used & giving leftover products to someone who can use them  
   c. Cleaning-up products spilled outside  
   d. All of these

3. **Depot workers are responsible for**
   a. Taking part in safety instructions  b. Using work practices described in the instructions  
   c. Reporting conditions that may be dangerous  
   d. All of these

4. **An inspection of the yard, storage room equipment and supplies is required**
   a. Once a week  b. Once a month  
   c. Once a year  d. Only if there is a fire or spill

5. **Which of these products are not accepted by the program?**
   a. Commercial or industrial products  b. Leaking or poorly sealed containers  
   c. Products in containers larger than 10 litres (gasoline larger than 25 litres)  
   d. All of these

6. **Which of these leftover consumer products are accepted by this program?**
   a. Gasoline, diesel fuel and propane  b. Pesticides, cosmetics and pet products  
   c. Pesticides, flammable liquids and gasoline  d. Cleaning products, solvents & insect repellents

7. **A pesticide product accepted under this program can be identified by**
   a. A “Poisonous” skull and cross bone symbol and a Pest Control Product number  
   b. A “Flammable” hazard symbol or warning of a fire hazard  
   c. An “Explosive” hazard symbol  
   d. All of these

8. **A flammable liquid accepted under this program can be identified by**
   a. A “Poisonous” skull and cross bone symbol and a Pest Control Product number  
   b. A “Flammable” hazard symbol or warning of a fire hazard  
   c. An “Explosive” hazard symbol  
   d. All of these

9. **Gasoline accepted under this program**
   a. Can be in any non-flammable container  b. Must be in a properly sealed, ULC container approved for gasoline  
   c. Can be in a ULC container without proper seals  
   d. Can be poured down the drain

10. **Which of these products are not accepted by the program**
    a. Fertilizer  b. Muriatic acid  
    c. Both  d. Neither
11. Hazards to be considered when working with returned products are
   a. Poison, fire and compressed gas hazards  
   b. Tripping & falling hazards
   c. Lifting hazards  
   d. All of these

12. A product that has a “Poisonous” hazards symbol might cause harm
   a. If you breathe the vapour in  
   b. If you get it in your eyes or on your skin
   c. If you swallow it  
   d. All of these

13. Products that have “Flammable” hazard symbol on them
   a. Do not require that you wear protective clothing when handling them  
   b. May be dangerous if a container is left so that vapours can build up in the air
   c. Can be stored outside the storage room  
   d. Are only dangerous if they are spilled

14. Personal protective equipment that must be worn when handling flammable liquids, pesticides and gasoline includes
   a. Chemical resistance gloves  
   b. Safety eyewear
   c. Neither of these  
   d. Both of these

15. Which of the following is an acceptable pesticide
   a. Pesticide without skull and cross bone symbol  
   b. Creosote and pesticides containing DDT
   c. Neither A or B  
   d. Both A and B

16. Products brought to the depot should be
   a. Taken to the storage room by the consumer  
   b. Collected from the consumer’s vehicle by a depot worker
   c. Carried in any container that is handy  
   d. Left outside the storage room until the end of the day

17. When a product is in a glass or fragile container
   a. It must be placed in a tote with enough absorbent to act as packing material  
   b. The tote must be placed in the bottom of the appropriate tub skid
   c. The lid of the tote must be kept closed  
   d. All of these

18. In case of an emergency such as a spill
   a. There is no danger if the spill is outside  
   b. The product can be left on the ground to evaporate
   c. There may also be a fire hazard  
   d. All of these

19. If a fire occurs inside the storage room
   a. Use the fire extinguisher to fight the fire  
   b. Open the door so the smoke and fumes can escape
   c. Close the door to smother the fire  
   d. Ask consumers to help fight the fire

20. What are the steps that should be used to deal with a spill?
   a. 1.Clean up the spill  
   b. 1.Contain the spill  2.Report it  3.Clean it up
   c. 1.Stop the flow  2.Secure the area
   d. 1.Ensure safety  2.Stop the flow  3.Secure the area
   3.Contain the spill  4.Report it  5.Clean it up
   4.Contain the spill  5.Report it  6.Clean it up

When you are finished this quiz, give it to the depot operator for checking.

(The following section is to be completed by the depot manager)

SCORE:  DATE:  MANAGER’S SIGNATURE:
1. This program is called the
   a. Product Care Stewardship Program

2. Consumers can help protect our environment by
   d. All of these

3. Depot workers are responsible for
   d. All of these

4. An inspection of the yard, storage room equipment and supplies is required
   b. Once a Month

5. Which of these products are not accepted by the program?
   d. All of these

6. What of these leftover consumer products are accepted by this program?
   c. Pesticides, flammable liquids and gasoline

7. A pesticide product accepted under this program can be identified by
   a. A “Poisonous” skull and cross bone symbol and a Pest Control Product number

8. A flammable liquid accepted under this program can be identified by
   b. A “Flammable” hazard symbol or warning of a fire hazard

9. Gasoline accepted under this program
   b. Must be in a properly sealed, ULC container approved for gasoline

10. Which of these products is not accepted under this program?
    c. Neither

11. Hazards to be considered when working with returned products are
    d. All of these

12. A product that has a “Poisonous” hazards symbol might cause harm
    d. All of these

13. Products that have “Flammable” hazard symbol on them
    b. May be dangerous if a container is left so vapours can build up in the air

14. Personal protective equipment that must be worn when handling flammable liquids, pesticides and gasoline includes
    d. Both of these

15. Which of the following is an acceptable pesticide
    b. Creosote and pesticides containing DDT

16. Products brought to the depot should be
    b. Collected from the consumer’s vehicle by a depot worker

17. When a product is in a leaking, glass or fragile container
    d. All of these

18. In case of an emergency, such as a spill
    c. There may also be a fire hazard

19. If a fire occurs inside the storage room
    c. Close the door to smother the fire

20. What are the steps that should be used to deal with a spill?
    d. 1. Ensure safety, 2. Stop the flow, 3. Secure the area, 4. Contain the spill, 5. Report it,
        6. Clean it up
Appendix 5

SHIPPING INFORMATION

AND

EMERGENCY CONTACTS
REQUESTING A SHIPMENT

WHEN TO REQUEST A SHIPMENT:

- One flammable liquid tubskid is full, and / or
- The aerosol or pesticide tubskid is ¾ full.
- Paint – half of the paint tubskids on your site are full and/or the paint aerosol tubskids is ¾ full.

HOW TO REQUEST A SHIPMENT:

Shipments may be ordered by calling:

604 592 2972 in the Lower Mainland (fax 604-592-2982)
or 1-888-772-9772 throughout the rest of B.C.

INFORMATION TO PROVIDE:

When ordering a shipment, please provide the following information:

- the number and type of tub skids to be picked up
- the number of empty totes you have remaining
- the number of bags of absorbent you have remaining
- the number of pairs of chemical resistant gloves you have remaining.

EMERGENCY CONTACTS

FIRE DEPARTMENT, POLICE or AMBULANCE 911 (in most areas)

PROGRAM HEADQUARTERS 1-888-772-9772

OTHER CONTACT INFORMATION

Recycling Council of BC (RCBC) (public information):
(604) 732-9253 in lower mainland 1-800-667-4321 outside lower mainland

Provincial Emergency Program (reportable spills): 1-800-663-3456
Appendix

Check one of the following emergencies and fill out the appropriate information. Attach a separate form if you need more space:

- **SPILL?**
  - Spill in parking lot
  - Spill in receiption area
  - Spill in other area: ____________________________________________
  - Type of surface spilled on ___ gravel ___ asphalt ___ concrete ___ wood
  - Spill caused chemical reaction, if so list the chemicals involved (if known)

- **FIRE?**
  - Fire in Flammable liquid/Pesticide room
  - Fire in reception area
  - Strobe light went on?
  - Fire in parking lot
  - Fire Department called
  - Fire in another location ___________________________________________________________________________
  - Fire in paint tubskids
  - Fire extinguisher used (if so, the unit(s) must be serviced)

- **PROPERTY DAMAGE?**
  - Flammable liquid/Pesticide Room damaged
  - Tubskid damaged
  - Fire extinguisher damaged
  - Other

GO TO PAGE 2
Describe in detail the incident, or accident. This includes exposure to chemicals, smoke, chemical inhalation and bodily injuries, as well as property damage. If a spill occurred, what was spilled, and any other information that is important to this incident

TO BE COMPLETED BY CURRENT AND/OR PREVIOUS OWNER:
By signing this form, I verify that no unreported spills have occurred at this site.

Signature ___________________  Print Name ___________________  Position _______  Date _______

Please mail or fax your completed questionnaire to the address/number above. Thank you.
CONSUMER WARNING SYMBOLS
CONSUMER WARNING SYMBOLS

The following are examples of consumer warning labels. Majority of consumer dangerous goods will have one or more of these symbols. It usually indicates a consumer product unless there are other types of warning symbols also attached to the container.

The PICTURE tells you the TYPE of Danger.

CORROSIVE
The product can burn your skin or eyes. If swallowed, it will damage your throat and stomach.

EXPLOSIVE
The container can explode if heated or punctured. Flying pieces of metal or plastic from the container can cause serious injury, especially to eyes.

FLAMMABLE
The product or its vapours, will catch fire easily if it is near heat, flames or sparks.

POISON
If you swallow, lick or even, in some cases, inhale the chemical, you could become very sick or die.

The SYMBOL on a container shows a PICTURE inside a FRAME, like this:

The more sides the frame has the more dangerous the product is.

Note: Products accepted under this program only cover some of these symbols and not all. Products with the Corrosive symbol are not acceptable except in the case of a few pesticides. You'll typically see the Flammable symbol on acceptable alkyd paint and flammable liquids. The Poison symbol will be on all acceptable pesticides and the explosive symbol will be on all aerosols.
Appendix 9

WORKPLACE HAZARDOUS MATERIALS INFORMATION SYSTEM (WHMIS) LABELLING
## WORKPLACE HAZARDOUS MATERIALS INFORMATION SYSTEM (WHMIS) – HAZARDOUS SYMBOLS

<table>
<thead>
<tr>
<th>CLASS</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CLASS A: COMPRESSED GAS</strong></td>
<td>This class includes compressed gases, dissolved gases, and gases liquefied by compression or refrigeration.</td>
</tr>
<tr>
<td><strong>CLASS B: FLAMMABLE AND COMBUSTIBLE MATERIAL</strong></td>
<td>This class includes solids, liquids, and gases capable of catching fire in the presence of a spark or open flame under normal working conditions.</td>
</tr>
<tr>
<td><strong>CLASS C: OXIDIZING MATERIAL</strong></td>
<td>These materials increase the risk of fire if they come in contact with flammable or combustible materials.</td>
</tr>
</tbody>
</table>
| **CLASS D: POISONOUS AND INFECTIOUS MATERIAL**  
Division 1: Materials Causing Immediate and Serious Toxic Effects | These materials can cause death or immediate injury when a person is exposed to small amounts. Examples: sodium cyanide, hydrogen sulphide |
| **CLASS D: POISONOUS AND INFECTIOUS MATERIAL**  
Division 2: Materials Causing Other Toxic EFFECTS | These materials can cause life-threatening and serious long-term health problems as well as less severe but immediate reactions in a person who is repeatedly exposed to small amounts. |
| **CLASS D: POISONOUS AND INFECTIOUS MATERIAL**  
Division 3: Biohazardous Infectious MATERIAL | These materials contain harmful micro-organisms that have been classified into Risk Groups 2, 3, and 4 as determined by the World Health Organization (WHO) or the Medical Research Council of Canada. |
| **CLASS E: CORROSIVE MATERIAL** | This class includes caustic and acid materials that can destroy the skin or eat through metals. Examples: sodium hydroxide, hydrochloric acid, nitric acid |
| **CLASS F: DANGEROUSLY REACTIVE MATERIAL** | These products may self-react dangerously (for example, they may explode) upon standing or when exposed to physical shock or to increased pressure or temperature, or they emit toxic gases when exposed to water. |
WHMIS hazardous symbols are distinct. They all have a “circle” shape. These labels are used to help alert and identify hazards related to dangerous goods used in the workplace. As this program handles only consumer products, majority of the acceptable products will not have these hazard symbol but a few will. For example: Latex containing the Toxic symbol is acceptable.

Having a WHMIS label does not necessarily mean the product is unacceptable. What it does mean is that you will need to take a closer look at the container label to see if there are any other indications that the product is unacceptable.

Any products containing the following labels are definitely UNACCEPTABLE!

- Compressed Gas
- Oxidizing
- Corrosive
- Reactive
- Poison
- Bio-hazardous/infectious symbol
Appendix
10

TDG LABELLING
TDG safety marks are distinct as all the labels will be “Diamond” shaped and will have a “Number” on it, usually on the bottom corner.

Any product displaying a TDG safety label is not accepted.
Appendix 11

EXAMPLES OF PROPERLY AND IMPROPERLY STACKED TUBSKIDS
Example of a properly packed pesticide tubskid. The totes on the bottom are packed with absorbent to cushion fragile containers. Absorbent is spread across the bottom of the tubskid itself and all containers are upright.

Properly filled and packed pesticide tubskid.
Example of a properly filled and packed paint tub skid.

Example of an IMPROPERLY filled and packed paint tub skid. This is a very good example of WHAT NOT TO DO.
EXAMPLES OF ACCEPTABLE PRODUCTS
Flammable liquids that are not industrial, meet the size requirements, but do not have a flammable symbol are still acceptable if the warning, “keep away from open flame or spark” is on the label.

An example of an acceptable ULC approved gas container that is properly sealed.

Paint thinners, strippers and turpentine are acceptable as flammable liquids.
This sample has a flammable symbol, meets the size requirements and is properly sealed. It is acceptable as a flammable liquid.

Anti-fouling paint contains pesticides. It is an acceptable product as a pesticide at Multi-Drop Depots, but not as a paint product at Paint Drop Depots.

Acceptable pesticides have both a Pest Control Product (PCP) Number and a poison skull and crossbones symbol.
Wood preservers such as this and Creosote are acceptable pesticides that have both a Pest Control Product (PCP) Number and a poison skull and crossbones symbol.

Shellac is acceptable as a paint but not a flammable liquid. When packing, this product should be placed in a paint tubskid and not with the flammable liquids.

This is an example of an acceptable flammable liquid product.
This is a properly sealed, original or appropriate container without a label. It is acceptable by using the Container Identification Label to identify the product inside the container. Please ensure the consumer returning a product such as this completes the label and attaches it to the container before accepting it.

Wood preservatives with a Pest Control Product (PCP) number and a poison skull and crossbones symbol are acceptable as a pesticide under the Multi-Drop Program, but not under the Paint Drop Program.

Deck coating, wood finishing, teak oils and Danish oils are acceptable paint program products.
Flammable liquid adhesives, glues and contact cement are acceptable as flammable liquid. Tile adhesive are not as they are a paste and not a liquid.
Appendix
13

EXAMPLES OF NON-ACCEPTABLE PRODUCTS
Although this sample is a flammable liquid product included in the program, the container is NOT properly sealed and should not be accepted.

This product has a Pest Control Product (PCP) Number, but has no poison (skull and crossbones) symbol. Therefore it is not an acceptable product.
Corrosive products such as bleaches, cleaners and other acids and bases are not acceptable.

This is an industrial product which means it is not acceptable in the program. Note the “industrial” marking.

This is an unacceptable container based on a number of reasons.

1. It has no label.
2. It is an unknown product.
4. Container integrity is in question.
This ULC approved gas container is not properly sealed and is therefore **NOT** acceptable. Note: you must check to ensure all spouts and vents are properly sealed. Only original caps may be used to seal containers.

Ready to use pesticides are not acceptable. These products do not have **both** a poison (skull and crossbones) symbol and a PCP Number.

Resins are not acceptable to the program at all.
This product is not acceptable for two reasons.

1. It is not properly sealed.
2. An industrial product.

Non-aerosol (liquid) automotive paint is not accepted by the program.

Colorants, tints and other paint additives are not accepted by the program.
Roofing products are not accepted by the program.

Indicators on the label such as “quick drying” are usually a sign that it is an industrial product.
