

LightRecycle Large Volume Generator Application Form: **Lamp Pick-Up Services**

Large volume generators in British Columbia, including businesses, contractors, relampers, schools, building managers, can qualify for a free pick-up service to recycle their lamps through the LightRecycle program.

Option 1: Pick-Up Service for Whole Lamps – minimum of one pallet

Large volume generators are encouraged to consolidate a minimum of one pallet or more of whole lamps (i.e. lamps that have not been intentionally crushed) to qualify for a free pick-up service. A consolidated pallet of lamps should contain approximately:

- 500 4 foot fluorescent tubes, or;
- 1,200 CFLs, or;
- 600 HID lamps or;
- A combination of lamp types that would equate to the same volume.

Note: lamps vary in size. The above estimates are guidelines only.

If you are able to generate a minimum of one pallet of lamps within a reasonable period of time, direct pick-up is a convenient option. LightRecycle requires the lamps to be safely packaged before picking up, and will supply approved collection containers at no cost if required. Collection containers can be requested in advance. **Containers and lamps MUST be protected from the weather and remain dry.**

Option 2: Pick-Up Service for Pre-Crushed Lamps – minimum of two drums

Some large volume generators use equipment such as a drum-top crusher to crush lamps in order to reduce required storage space. Large volume generators that have consolidated a minimum of two full UN-approved drums of crushed lamps will qualify for a free pick-up service. Replacement drums are supplied, at no charge, upon request when drums are picked up.

Complete this Application Form

Please complete this application form to be registered as a large volume generator with the program to receive lamp pick-up services.

Once completed, the form can be emailed to **pickup@lightrecycle.ca** (preferred option) or faxed to **604 592-2982**.

If you have questions on this matter, please contact Wayne at **pickup@lightrecycle.ca** or by phone at **1-888-811-6234. (ext 216)**

Note:

The LightRecycle program also includes collection sites for consumers with household quantities of lamps (bulbs and tubes) as well as separate collection sites designated to accept lamps from large volume generators (contractors etc.). In general, these sites are for those with smaller quantities of lamps that do not generate enough lamps to qualify for the pick-up services outlined above. Large volume generator collection sites will NOT accept volumes of lamps that exceed one pallet. Collection sites do NOT accept intentionally crushed lamps. See **www.lightrecycle.ca** for more information.

LightRecycle Large Volume Generator Application Form: Lamp Pick-Up Services

Please complete this application form to be registered as a large volume generator with the program to receive lamp pick-up services. Once completed, the form can be emailed to pickup@lightrecycle.ca (preferred option) or faxed to **604 592-2982**. Please ensure you have completed both pages (see below).

Company Information:	
Company Name	
Contact Person	
Contact Phone	
Contact Email	
Contact Fax	
Site Information:	
<i>Note: if you have multiple sites, please provide requested information for each site (form can be modified as required, or attach a separate list)</i>	
Site Address	
Operating Days/Hours	
Relevant details on shipping location, if applicable (which door to access etc.)	
Estimated Number of <u>Whole</u> Lamps Generated Monthly:	
<i>Please <u>estimate</u> the number of whole lamps (i.e. lamps that have not been intentionally crushed) that you expect to generate for pick-up by LightRecycle on a monthly basis.</i>	
2 and 4 ft fluorescent tubes:	
8 ft fluorescent tubes:	
Large lamps: Large High Intensity Discharge (HID) lamps etc.	
Other regular-sized lamps : CFL, halogen, incandescent, LED, small HID, small shaped tubes etc.	

Please complete the rest of the form on the next page.

LightRecycle Large Volume Generator Application Form: Lamp Pick-Up Services

Please complete this application form to be registered as a large volume generator with the program to receive lamp pick-up services. Once completed, the form can be emailed to **pickup@lightrecycle.ca** (preferred option) or faxed to **604 592-2982**. Please ensure you have completed both pages (see above).

Company Information:	
Company Name (please provide again in case pages are separated if faxed)	
Estimated Number of Drums of <u>Pre-Crushed</u> Lamps Generated Monthly:	
<i>Please <u>estimate</u> the number of drums of pre-crushed lamps (i.e. lamps that have been crushed using a drum-top crusher) that you expect to generate for pick-up by LightRecycle on a monthly basis.</i>	
Drums:	
Generator Registration Number (crushed lamps only):	
<i>Note: Crushed lamps are classed as Leachable Toxic Waste under the BC Hazardous Waste Regulation (BCHWR) and generators that produce or store, in a 30 day period, or ship at one time any volumes in excess of 500 kg are required under the BCHWR to register as a generator of hazardous waste in BC. See here: http://www.env.gov.bc.ca/epd/hazwaste/generators/index.htm</i>	
Generator Registration Number:	
Recycling Information (whole lamps and/or pre-crushed lamps):	
Were you receiving lamp pick-up/recycling services prior to October 1, 2012?	
If yes, which company provided service to your sites(s)? <i>Note: answer is optional for this question if considered confidential.</i>	
If yes, please describe the type of collection containers (boxes etc.) that you have been using and who have been providing.
