

## Saskatchewan HHW Accepted and Not Accepted Products Lists for PCA Members

This document is intended to be used by PCA Members only to assist in determining program product classifications.

The product types listed in each program category are meant to be a general guide for product classification; however, it is the responsibility of the steward to utilize the program product definitions or program Decision Tree(s), where applicable, to determine whether a product is included or excluded in each program.

### HHW Products Accepted

The product types listed in each program category are meant to be a general guide for product classification; however, it is the responsibility of the steward to utilize the program product definitions or program Decision Tree(s), where applicable, to determine whether a product is included or excluded in each program.

**Note: Material classification follows a hierarchy as depicted in the Saskatchewan Household Hazardous Waste Product Stewardship Program Plan.**

### Flammable Materials

Products that display the flammable symbol and is a liquid or aerosol. Maximum container size for flammable liquids is 10 litres and 680 grams or 24 ounces for aerosols.

- ✓ Acetone
- ✓ BBQ lighter fluid
- ✓ Camping fuel
- ✓ Fondue fuel
- ✓ Flammable degreasers
- ✓ Flammable lubricants
- ✓ Flammable liquid adhesives
- ✓ Flammable fuel treatment and additives
- ✓ Methanol (Methyl hydrate)
- ✓ Paint stripper
- ✓ Paint thinners
- ✓ Paint and varnish remover
- ✓ Turpentine
- ✓ Other flammable solvents
- ✓ Gasoline - fees based on the number of gasoline stations in the province

## Corrosive Materials

Products that display the corrosive symbol, and are a liquid, aerosol or solid. Maximum container size is 10 litres and 680 grams or 24 ounces for aerosols.

- ✓ Rust remover
- ✓ Masonry cleaner
- ✓ Pool and hot tub cleaners
- ✓ Grout cleaner
- ✓ Disinfectants

## Toxic Materials

Products that display the poison symbol, the word “Danger” and are a liquid or aerosol. Maximum container size is 10 litres and 680 grams or 24 ounces for aerosols.

- ✓ Furniture stripper
- ✓ Automotive additives
- ✓ Lubricants
- ✓ Tar and bug remover
- ✓ Kerosene
- ✓ Mineral Spirits
- ✓ Paint thinners (e.g. Varsol)

## Physically Hazardous Materials

Products that display both the flammable symbol and explosive symbol. Container must be non-refillable and a maximum size of 5kg.

- ✓ Fuel cylinders
- ✓ Camping cylinders
- ✓ Butane cylinders

## Pesticide Products

Consumer pesticides that have the poison (skull & cross bones) symbol combined with signal words “Danger”, “Warning” or “Caution”, Pest Control Product (PCP) number and the word “Domestic” on the label. Maximum container size is 10 litres and 680 grams or 24 ounces for aerosols.

- ✓ Liquid, powder and solid pesticides
- ✓ Aerosol containers

- ✓ Insect repellents
- ✓ Pet products

## HHW Products Not Accepted

- × Commercial, industrial or agricultural products
- × Rechargeable batteries
- × Lead acid batteries
- × Other batteries (including zinc-air, zinc-carbon, silver-oxide or alkaline-type batteries)
- × Oil / antifreeze
- × Mercury switches
- × Fertilizer
- × Wine and distilled spirits
- × Refillable propane cylinders
- × Ammunition
- × Drugs and medicines
- × Caulking compound
- × Diesel
- × Medical sharps
- × Cosmetics
- × Powder forms (solid) of masonry products, cement, grout, mortar, plaster of Paris
- × Product has a WHMIS or GHS label (symbol contained in red diamond)
- × Products under the flammables and corrosive categories that are intended for use down the drain during its primary intended use, such as bleach and drain cleaners.
- × Flammable liquids, corrosives or toxics sold in containers greater than 10 litres or greater than 680 grams/24 ounces for aerosols
